SKILLS

- **JavaScript**
- **React**
- **REST API Integration**
- **Object-Oriented Programming (OOP)**
- **Git & GitHub**
- **HTML5 & CSS3**
- **Debugging & Troubleshooting**
- **Data Structures & Algorithms**
- **Problem Solving**
- **Team Collaboration**

SECURITY CLEARANCE

Active TS/SCI Clearance with Polygraph

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience developing web applications using JavaScript, React, HTML, CSS, REST APIs, and Git. Backed by over five years of U.S. Air Force experience supporting enterprise IT infrastructure, troubleshooting complex technical issues, and maintaining mission-critical systems. Recognized for strong analytical thinking, adaptability, and collaborative problem-solving, with a passion for designing, developing, and maintaining scalable software solutions while continuously expanding technical expertise.

PROJECTS

NFL Fantasy Analyzer

React • JavaScript • Axios • REST APIs • HTML • CSS • Vercel

- Developed a responsive web application that compares NFL players and analyzes season statistics.
- Integrated multiple REST APIs to retrieve player data, images, and YouTube highlights.
- Built reusable React components and implemented state management for a dynamic user experience.
- Deployed the application using Vercel and managed source code with GitHub.

San Diego Top Spots

React • JavaScript • HTML • CSS

- Built a React application that displays popular attractions in San Diego using component-based architecture.
- Rendered dynamic content from JSON data while creating a responsive and user-friendly interface.
- Applied React fundamentals including props, state, and reusable components.

Change Calculator

JavaScript • HTML • CSS

- Developed an interactive web application that calculates the appropriate change based on a transaction amount and payment received.

- Implemented JavaScript logic to break down change into individual currency denominations.
- Added input validation and dynamic DOM updates to provide accurate, real-time calculation results.

Very Simple To-Do App

React • JavaScript • HTML • CSS

- Developed a responsive task management application that allows users to add, complete, and remove tasks.
- Utilized React state management and event handling to dynamically update the user interface.
- Implemented reusable components and clean code practices to create an intuitive user experience.

EXPERIENCE

June 2026 - Present

Software Developer Apprentice

Creating Coding Careers, San Diego, CA

- Developed responsive web applications using **JavaScript, React, HTML, CSS, and REST APIs** following modern front-end development practices.
- Developed multiple React and JavaScript applications utilizing REST APIs, component-based architecture, and responsive design principles.
- Collaborated with mentors and fellow developers using **Git/GitHub** to manage source code and implement feature enhancements.
- Solved algorithmic programming challenges involving arrays, strings, objects, recursion, and data manipulation using JavaScript.
- Designed, tested, and deployed full-stack and front-end applications while following clean code and version control best practices.

October 2024 - June 2026

Capabilities Manager

Air Force, San Antonio, TX

- Managed 24/7 global IT infrastructure by monitoring and resolving outages supporting more than 50,000 analysts worldwide while maintaining over 4,000 network assets across 600+ locations.
- Managed incident tracking, system analysis, and enterprise record management for mission-critical technology infrastructure.

May 2022 - October 2024

Tactical Communication Technician

Air Force, Eielson AFB, AK

- Configured routers, switches, modems and other networking equipment for optimal performance.
- Maintained IT hardware and software for local computers.

- Configured, coordinated, and set up portable satellite communication systems including Hawkeye 3 Lite, Hawkeye Heavy, and Starlink.
- Developed user training materials for new communication systems being deployed.

January 2021 - May 2022

Client Systems Technician

Air Force, Eielson AFB, AK

- Procured, installed, configured, monitored, and maintained IT hardware and software in accordance with the DoD policy and guidance.
- Troubleshoot program and system malfunctions to restore normal functioning.
- Linked computer systems within organization to increase compatibility so that information can be shared.

EDUCATION

April 2026

Bachelor of Science (B.S.) in Computer Science

Western Governors University, Millcreek, Utah

CERTIFICATIONS

- Security +
- Linux Foundations
- ITIL 4 Foundations
